REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Written Opinion of the International Searching Authority, as submitted by Applicant, has some comments which are apparently directed to the Vinal reference, U.S. 4,048,648. This reference was previously considered by the undersigned examiner, and was not applied against the claims. The reference teaches a magnetically sensitive field effect transistor (or two transistors in series), not a Hall element. As noted in Applicant's specification, page 1, [0002], sensors operating on the Hall effect can be modeled as a Wheatstone bridge. For example, the contacts which sense the Hall voltage could occur as a pair, more or less opposite one another, and more or less transverse to the main current flow direction. The FET of Vinal has only a single sensor 6, 16, and the two FETs in series, as in figures 8 or 9, do not have sensor elements placed in a Wheatstone configuration. Moreover, the Vinal reference itself does not refer to its device as a Hall element, but as a magnetically sensitive field effect transistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.
